What is this product?

Type
The fund is a contractual umbrella fund under Swiss law of the type “Other funds for traditional investments”.

Term
The investment is designed for a long term investment horizon and recommends a minimum holding period of five years or longer.

Objectives
The investment objective of the subfund of this umbrella fund is mainly, by investing in a portfolio of equity securities and book-entry equity securities in Swiss companies, to achieve long-term value growth in Swiss francs that exceeds the benchmark index (Swiss Performance Index (SPI) – Total Return Index in CHF). The subfund primarily invests in equity securities and book-entry equity securities (shares, dividend-right certificates, shares in cooperatives, participation certificates, etc.) as well as in other investments permitted under the fund contract. Derivatives can be used for hedging purposes and for efficient portfolio management. Furthermore, derivatives can also be used for investment purposes. This does not produce a leverage effect. Income can be distributed each year.
The currency of the subfund is CHF and the currency of the share class is CHF.

Intended retail investor
XC shares are exclusively reserved for investors who invest at least CHF 2'000,000 per initial subscription or have entered into a corresponding agreement with DWS CH AG or its distribution partner. Taking into consideration the minimum recommended holding period, the return will depend on the performance of the underlying investments.
The custodian bank of the fund is State Street Bank International GmbH, Zurich.
The sub-fund is intended for retail investors with knowledge and/or experience of these types of products, that have obtained appropriate investment advice, that have medium to long-term investment horizon and that have the ability to bear losses up to the amount they have invested in the sub-fund.

What are the risks and what could I get in return?

Risk Indicator:

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this product as 4 out of 7, which is a medium risk class.
This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.
Be vigilant about currency risk if your reference currency differs from that of the Product. Because you may receive payments in a different currency, the final return you obtain depends on the exchange rate between the two currencies.
This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years.
Markets could develop very differently in the future.
The stress scenario shows what you might get back in extreme market circumstances.
This type of unfavourable scenario occurred for an investment between December 2021 - December 2022 (if you exit after 1 year), December 2021 - July 2026 (if you exit after 5 years).
This type of moderate scenario occurred for an investment between May 2019 - May 2020 (if you exit after 1 year), February 2019 - February 2024 (if you exit after 5 years).
This type of favourable scenario occurred for an investment between October 2020 - October 2021 (if you exit after 1 year), December 2016 - December 2021 (if you exit after 5 years).

Recommended holding period: 5 years Example Investment: 10’000 CHF Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	**You could lose some or all of your investment.**		
Stress	**What you might get back after costs**	4’350 CHF	4’140 CHF
	Average return each year	-56.5 %	-16.2 %
Unfavourable	**What you might get back after costs**	8’260 CHF	11’420 CHF
	Average return each year	-17.4 %	2.7 %
Moderate	**What you might get back after costs**	10’720 CHF	13’890 CHF
	Average return each year	7.2 %	6.8 %
Favourable	**What you might get back after costs**	13’300 CHF	19’000 CHF
	Average return each year	33.0 %	13.7 %

What happens if Solutions & Funds SA is unable to pay out?

Investors who have invested in this product will not suffer any financial losses in the event of a default by Solutions & Funds SA, as the sub-fund is considered an independent legal entity with separately managed assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10’000 CHF is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	70 CHF	462 CHF
Annual cost impact (*)	0.7 %	0.7 %

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 7.5 % before costs and 6.8 % after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 CHF
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 CHF
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	0.4 % Impact of costs deducted annually for investment management. This is an estimate based on actual costs over the last year.	40 CHF
Transaction costs	0.3 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	30 CHF
Incidental costs taken under specific conditions		
Performance fees [and carried interest]	There is no performance fee for this product.	0 CHF

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

In accordance with the investment objective described above, the product is designed for a long term investment horizon. It is an open-ended product. Investors can sell their investment on a daily basis (on business days).

How can I complain?

If you have any complaints about the product, please contact the person who recommended it to you or the fund management company directly: Solutions & Funds SA, Promenade de Castellane 4, 1110 Morges, email: info@solutionsandfunds.com.

Other relevant information

There is not yet sufficient data to provide investors with useful information on past performance.

The calculations of previous performance scenarios can be found under https://documents.anevis-solutions.com/solufunds/CH1559311779_scenario_export.csv

As the fund manager of this collective investment scheme, we are required to provide you with the relevant fund documents (the current fund prospectus and contract, as well as the semi-annual and annual reports) free of charge. These and other fund documents are available on our website, “www.solutionsandfunds.com,” under the “Funds” section. This document may serve as a reference for any other class of the fund.
